

Dane County Water Resource Engineering Erosion Control
Application

Neighbor's consent to change of grade within 5 feet of property
line

My name is Carrie Cummins. I own the property to the west that abuts the proposed project at 3196 Aalseth lane, Camp Dewey. My address is 3198 Aalseth Lane Lot #13. I have no issue with a change in grade as long as the result of such change does not pass any additional water onto or across my property and any work done to the grade change is all done on the project property, Lot #14. Further any work to blend the grade between properties is at the expense of the owner of Lot #14, including but not limited to engineering design, permit approval, permit fees, earth works, retain walls, finish grade, seeding, etc.

Additionally, that any and all work done is at the approval of Dane County Zoning and meets all applicable local, county and state Zoning requirements.
